

## -: TOURNEY - GINIE :-

### INTRODUCTION :-

Tourney-Genie is an admin dashboard designed to manage and book tour and destination efficiently. It provides an user-friendly interface for administrators to oversee travel-related data and manage bookings seamlessly.

### PURPOSE & OBJECTIVE :-

The main goal of Tourney-Genie is to provide an intuitive admin panel where travel agency managers can:-

- ① Add, update and delete tours of and destinations.
- ② Manage user reviews and ensure quality contently.
- ③ Handle tour and destination - supremo

- bookings.
- ① Track bookings, payments and customer details.

## FEATURES & FUNCTIONALITIES :-

### ① Admin Panel layout :-

- Fixed left sidebar (background: #ffccbc, #ff9800, #ff7f0e, #ff5726) with the heading "JOURNEY-QNITE".
- Top navigation bar for quick actions.
- Collapsible content area on the right.

### ② User & Destination Booking System

- Users can book tours and destinations.
- Admins can view, approve and supremo.

manage bookings.

- Future enhancement :- automated booking confirmation and payment integration.

③ Data Management :-

- Data tables for displaying tour, destination and bookings.
- Add button for inserting new records.

④ Review Management :-

- Users can submit reviews for tours.
- Admins can delete inappropriate reviews dynamically.
- Future enhancement :- Approval system for reviews.

supremo®

### ⑤ Custom Styling and Icons :-

- Uses Font awesome icons for a modern look.
- Fully styled using custom css (no Bootstrap).

### ⑥ Future Enhancements :-

- User authentication and role-based access.
- Graphical analytics dashboard (e.g. tour popularity, revenue)
- API Integration for real-time data update.

### ④ Security & Authentication (Upcoming features) :-

- User authentication (Admin must log in to access the dashboard).

supremo®

- Role-based access Control (only authorized users can perform specific actions).
- Secure API to protect sensitive data.
- Future Enhancement : Two-Factor Authentication .

### TECHNOLOGIES USED :-

Frontend : HTML, CSS, JavaScript  
Backend : Java (Spring Boot).  
Security : Spring Security .  
Database : MySQL .  
Tools : Thymeleaf , Lombok , JPA .

Date :- 13-01-2025

## ① Setting up a Spring Boot Project in vs code :-

- ① Download and Install Java JDK.
  - Download JDK 17 or later from Oracle or Open JDK.
  - Verify Installation:  
java -version
- ② Install Maven
  - Install from Apache Maven
  - Verify Installation:  
mvn -version
- ③ Install Visual Studio Code & Extensions
  - Install the VS code extensions:
    - Spring Boot Extension Pack
    - Java Extension Pack
    - Lombok annotations support for VS code

## ② Create a Spring Boot Project :-

- ① Using Spring Initializer

supremo

→ Open Spring initializer in a browser: start spring.io

② Select:

- project: maven
- language: Java
- Spring Boot version: 3.0

③ Dependencies:

- Spring web
- Spring Thymeleaf
- Dev
- Jpa (spring data jpa)
- Validation
- Lombok
- MySQL - driver.

④ Click Generate, the download the ZIP file.

⑤ Extract the project and open it in code.

③ Open and Run the code in vs code :-

- Open the project folder in vs code.
- Run the Spring boot application.
- Just if the project is running.

Date :- 19-01-2025

\* Created a Home Page :-

- Implemented HomeController.java to handle / route.
- Designed home.html and style using css named home1.css.
- Test the page by running the application and opening <http://localhost:1234/> (path).

Date :- 15-01-2025

EDITED HOME PAGE :-

- Edited home page for providing suprendo

- A good look to the home page.
- Added destination, attraction and tour section to the home page.
- Working on editing of home page.

Date :- 16-01-2025

#### DESIGN OF HOME PAGE :-

- Added a banner of why user/ customer should choose our website.
- Also added a offer part where best offers of towns and destinations will be present.

Date :- 17-01-2025

#### CREATING BOOKING SECTION AND REVIEW PART :-

- Created a booking section where supremo®

- user can book a tour or destination whatever he/she wants.
- Also created a review section where user can give reviews.

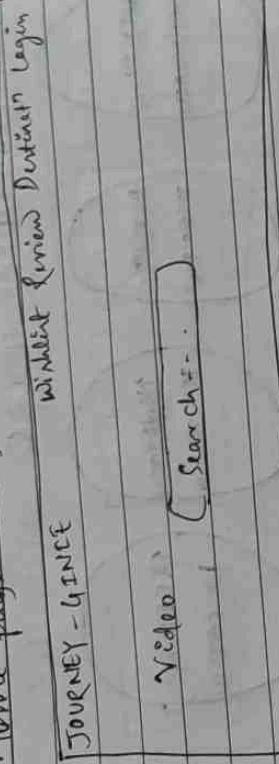

ADDED FOOTER :-

- Created a footer wherein good user experience and for developing a modern good-looking website.

### Working on Pdp Page :-

- Working on pdp page of both destination and tour page.
- DESTINATION PDP :-
  - Have destination details (title, description, price etc).
  - Image and pricing information.
  - Booking button which will be linked to booking page.
- \* TOUR PDP PAGE :-
  - Have tour details (title, description, itinerary).
  - Image and pricing information.
  - Booking button which will be directed to booking page.

Date :- 21-01-2025

### A WORKING ON BOOKING PAGE :-

Developed the booking page with the following features:-

- User selects a tour package / destination from the PDF page.
- From the customer details (name, email, phone number, no. of travellers, preferred date).
- Pricing summary based on selection.
- Payment options (UPI, paypal etc)
- Payment and to be integrated later.
- Booking confirmation message after submission.

Yale 6 - 22-01-2025

\* BOOKING SUCCESSFUL PAGE :-

- Displays a confirmation message for the user after a successful booking.
  - Shows tour names, travel date, number of travellers and total price.
  - Thank you message saying "Thank you for booking with us."
  - Booking successful message
  - Navigate Buttons :-
    - Options to return to the homepage or explore more tours at destination.

Rash

THE POWER

Date :- 23-01-2025

\* STARTED MAKING ATTRACTION PAGE :-

- It contains the following features :-

- ① List of Attractions :-  
Display various attractions available for visitors.
- ② Images and descriptions :- Also created a separate pfp page where every attraction has high-quality images and brief description.
- ③ Nearby Activities :- Suggestions for things to do near attractions.
- ④ Also added a button where maine is discover more, after clicking it, this will direct to pfp page where all the attractions are present.

supremo®

Date :- 24-01-2025

\* MADE PAGE FOR TRAINS, BUSES,  
AEROPLANES & ACCOMODATIONS :-

• Made a page where following  
features are providing :-

① List of Hotels and stay :-

Displays different hotels, resorts  
etc homestays.

② Sort by price, rating, location  
and amenities.

→ Show images, description, facilities  
and reviews.

③ List of Train :-

→ In the same page, added trains,  
timing, duration and images.

④ Bus :-

supremo

→ In same page there is a option  
for buses, cab and aeroplanes.

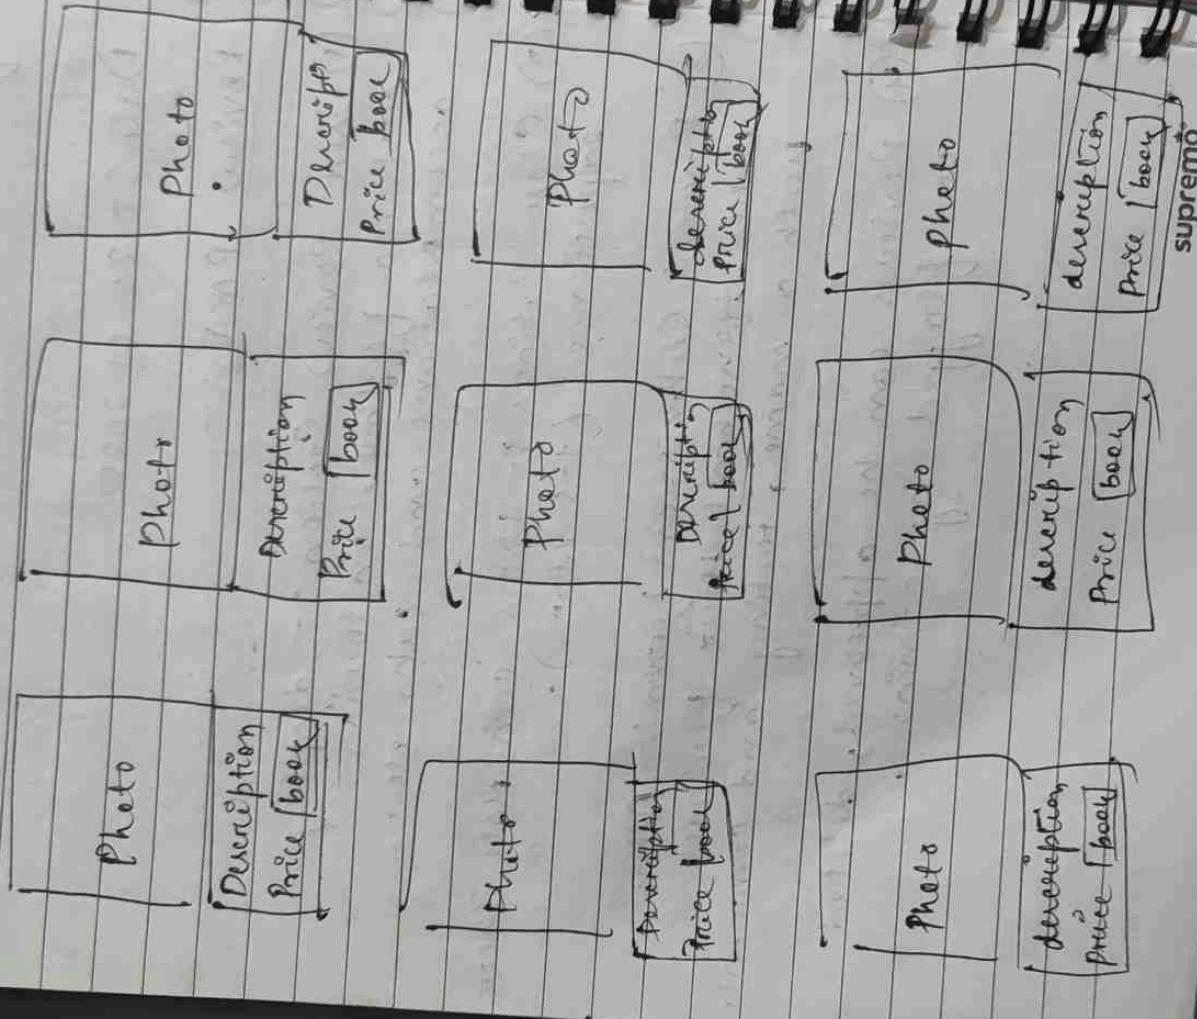

Date :- 25-01-2025

### Review Page :-

- ① User Review Section :- displays customer feedback on tours, accommodations and cab etc.
- ② Star Ratings :- Users can rate their experience (1-5 stars).
- ③ Review Submission Form :- Allow users to submit their feedback with a name, rating and comment.
- ④ Reviews can be approved, deleted or flagged by admins.

## CREATE ENTITY CLASS FOR EVERY FIELD :-

- ① An entity class represents a class representing a database table in java.
- It typically includes fields (variables), getters/setters, constructors, annotations, and relationships.

→ How to create ?

- Mention the name of the entity (e.g. Tour, Destination, Van etc).
- Describe the fields & added (e.g. id, name, price, location).

Date : -29-01-2025

### \* CREATED A REPOSITORY :-

- Created an interface `valindung` `TpaRepository` to interact with database.
  - e.g:-  
import org.springframework.data.jpa.repository;  
`TpaRepository`;
- public interface `TpaRepository` extends  
`TpaRepository<Tour, String> {  
}`

supremo®

Date :- 30-01-2025

\* SETTING UP MySQL FOR MY PROJECT :-

Today, I focused on preparing my database for the 'Jewelry-Girl' project. Since, I need to store item packages, bookings, packages, fees, destinations, etc.

Step :- 1 After installing database if not present and connect it with spring boot.

Step :- 2 Creating my database :-

To keep all my project data organized, I created a new database :-

```
CREATE DATABASE Journey - Girl;
```

I checked if it was created successfully.

Date :- 31-01-2025

### \* ADDING MySQL DEPENDENCIES :-

- Already added MySQL dependency during project setup.
- Next, I needed to tell Spring boot how to connect to my journey-guru database.
- I opened application properties and added,

spring.datasource.url = jdbc:mysql://localhost:1211/journey-guru.  
spring.datasource.username = root  
spring.datasource.password = mypassword  
spring.datasource.driver-class-name = com.mysql.cj.jdbc.Driver.

spring.jpa.database-platform = org.hibernate.dialect.MySQL5Dialect  
spring.jpa.hibernate.ddl-auto = update  
spring.jpa.show-sql = true.

FEBRUARY

Day :- 01-02-2025

\* STARTED WORKING ON ADMIN PAGES :-

→ Planning The admin Panel :-

The admin panel is essential for managing tours, packages, destinations, bookings, dashboard and widget.

→ It has the following features :-

- A fixed left sidebar.
- A top navigation bar.
- A main content area.

b:

→ Admin can add tours, destinations and get data from booking word from the front-end side.

supremo®

Date :- 02-02-2025

\* CREATED A HOME PAGE FOR ADMIN DASHBOARD USING HTML, CSS AND JS:-

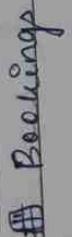

- I have created a home page for admin dashboard.
- It has a fixed left side bar.
- A top navigation bar.
- A main content area with summary cards for total tours, destinations and bookings.
- A responsive layout with font awesome icons.
- Now, I need (css styling) to make the dashboard look professional. which is admin.form.css.

ADMIN DASHBOARD (HOME PAGE):-

Dash Home Team

Destinations	Total	Bookings

LOGOUT PAGE :-
  - Purpose :- To allow admin users to securely logout of the system.
  - Functionality :-
    - Ends user session.
    - Redirects to the login page after confirmation.
    - Provides a "cancel" option to stay logged in.

supremo

Date :- 09-02-2025

\* WORKING ON DATABINDING OF  
ADMIN DASHBOARD :-

→ Purpose :- automatically link backend  
data to the admin panel UI.

→ It ensures real-time updates without  
manual intervention.

→ Improves efficiency by reducing  
redundant code.

\* Steps :-

→ Fetched data from the database and  
displayed it on the UI.

→ Used loops to dynamically populate  
tables for hours, buildings,  
destinations and packages.

→ Enabled real-time update when data  
is added, edited and deleted.

nd

Date :- 10 - 02 - 2025

- \* Fixing errors :-
  - Data not displaying correctly in tables.
  - Buttons are not working.
  - Debugging steps taken :-
    - Used console logs and debugging tools to identifying errors.
    - Checked backend logs for errors in database queries.
    - Fixed CSS layout issues for responsive.

supremo®

Date : 11-01-2020

#### \* FIXING REMAINING ISSUES :-

- Table data not updating properly after actions
- Forms not validating correctly.

#### \* Fixes Applied :-

- Checked SQL queries for syntax errors and missing values.
- Fixed foreign key constraints causing data insertion failure.
- Used javascript event listeners to ensure buttons work as expected.
- Corrected CSS styling issues for misaligned buttons and texts.

supremo

Date :- 12 - 02 - 2025

\* WORKING ON DATATLIDING OF TOUR  
PART OF ADMIN DASHBOARD :-

Step 1 :- Fetching Tour Data from database

- Retrieve tour details (name, location, price, images, availability etc) from the database.
- Use an API or query to fetch the data.

Step 2 :- Displaying data in Admin Panel:

- Use javascript to fetch and display tour details.
- Update the HTML table when new data is received.

supremo

Date :- 13 - 02 - 2025

\* WORKING ON THE DASHBOARD DATA BINDING  
- 4 TO HOME PAGE / DESTINATION HOME  
PAGE :-

- Created an input form for adding new items.
- Send data to the backend and refresh the table dynamically.
- In HTML part added a loop tag by the help of which data is coming from dashboard to frontend.
- Successfully compiled this part.

Date :- 14-02-2025

#### \* DATA IN THE PART OF DESTINATION PAGE :-

Step 1 :- Fetching data from destination table from database.

- Retrieve destination details (name, country, city, Images etc).
- Use an API or query to fetch the data.

Step 2 :- Displaying data in Admin Panel

- Use javascript to fetch and display destination details.
- Update the HTML when the data is received.

supremo

Date :- 15-02-2025

#### \* ADDING A NEW DESTINATION:-

- Create an input form for adding new destinations.
- Send data to the backend and refresh the table dynamically.
- This part is completed.

Date :- 16-02-2025

#### \* WORKING ON IMAGE UPLOADING :-

- The image is manually placed in uploaded images folder.
- The image filename is stored in the database for retrieval.

Date : - 17 - 02 - 2025

\* WORKING ON ERROR IN IMAGE UPLOAD :-  
→ There was an error in uploading part .

→ The image is coming to upload-images folder and in database but not showing in dashboard and frontend .

→ Error fixed .  
18-02-25

Date :- 18-02-2025

\* WORKING ON IMAGE UPLOADING OF TOUR PART :-

→ Doing image uploading as i did in the destination park .  
→ The image is successfully added and it is stored in database and showing in front end .

supremo®

Date :- 19 - 02 - 2025

\* WORKING ON BOOKING PART OF  
ADMIN DASHBOARD :-

- Storing Booking data in database.
  - The booking form is capturing user details, selected tour, and payment information.
  - When a user submits a booking, the data is saved in the database.
- Date :- 20 - 02 - 2025
- \* WORKING ON FRONTEND PART OF  
BOOKING :-
- The user selects a tour package and enters details.
  - The data is sent to the backend for processing.
  - Dynamically load tours into the supremo

- dropdown from the database.
  - The form sends booking details to the backend for storage.
- Date :- 21-02-2025
- \* Working on Bookings part :-
    - The backend handles booking form submissions and stores the data.
    - The admin should see all bookings in a table.
    - They can update status, make payments or cancel a booking.
    - The admin can mark a booking as confirmed or cancelled.

supremo®

Date :- 22-02-2025

### \* WORKING ON PACKAGES PART OF ADMIN DASHBOARD :-

- Admin enters package details, including an image file name.
- After entering details, the form sends package data to the backend API.
- When the admin submits the form, the backend API enters the package into the database.

Date :- 23 - 02 - 2025

\* WORKING ON FRONTEND PAGE OF  
PACKAGES :-

- The admin panel should fetch and display all packages in a table.
- The admin can edit package details such as name, price or availability.
- Admin can remove a package if it is no longer available.

Date :- 24 -02 - 2025

### \* WORKING ON SEARCH BAR :-

- Today, I worked on adding a search bar to the home page so users can quickly find their desired travel packages.
- This feature allows visitors to filter packages based on keywords related to the package name, location or description.

( March.... )

Syrujan  
25-02-25

Date :- 25-02-2025

### \* IMPLEMENTING FEATURE TO SEARCH-BAR:-

- wrote loop in html to working of search-bar.
- implemented client-side search for instant filtering.

Date :- 26 - 02 - 2025

\* WORKING ON GITHUB'S ERROR ONLY :-

→ There is an error in git pull,  
trying to fix that.

Date :- 27 - 02 - 2025

→ GitHub conflict occurred when  
merging. So, today also trying  
to fix that.

Date :- 28 - 02 - 2025

→ GitHub error fixed.

MARCH

Date :- 01-03-2025  
\* WORKING ON DATASTANDARDLY OF  
REGISTRATION PAGE :-

- Once the user submits the form, the data needs to be send to the backend for processing.
- Captures from data and sends it to backend.
- Redirects to the login page after successful registration.

Date :- 02/03/25

#### \* WORKING ON BACKEND PART OF REGISTRATION :-

- On the backend, we store user details in a users table.
- Insert users data into the database.
- Encrypts passwords (to be improved with bcrypt for security).
- Sends a success message after registration.

Date :- 03/03/25

- \* RETRIEVING REGISTERED USERS :-
  - Admin can view a list of registered users .
  - Created a registration form with data binding .
  - Stored user details in database .
  - Redirected users to the login page after registration .
  - Created an API to retrieve registered users .

*Entrega*  
03-03-25

supremo

Date:- 04/09/25  
\* ADDED LOGIN FUNCTIONALITY :-

- Today, I worked on implementing the logic system for Journeyline.
- This allows users (admins and customers) to log in using their email and password, and it verifies their credentials with the database.

supremo

Date :- 05/03/25  
WORKING ON BACKEND PART OF LOGIN:-

- Once the user enters their credentials, they need to be sent to the backend for validation.
- Sends login credentials to backend:
- Stores user details in database after successful login.
- Redirects to the dashboard after successful authentication.
- If the user is new or doesn't have an account, it will direct to the registration page.

Date :- 06/03/25

### \* WORKING ON WIDGET DATATABLE :-

- Worked on the widget page for offers in journey - grid dashboard.
- This page allows the admin to manage special deals and discounts for travel packages.
- Created a structured layout following the admin panel's design pattern.
- Added a datatable to display existing offers, including columns for offer name, discount percentage, start and end dates, and status.
- Now, the offers will show when admin adds the offers.

supremo

Date: 07/03/25  
\* WORKING ON DISCOVER MORE BUTTON  
FUNCTIONALITY :-

- I have updated the discover more button functionality on attraction page.
- When user click on discover more button, it will direct to the pop page of attractions →

Date :- 08/03/25

\* WORKING ON FUNCTIONALITY OF OTHER BUTTONS :-

→ Updated the buttons of buses, trains, accommodations of booking part.

Date :- 09/03/25

\* WORKING ON REVIEW PART OF HOME PAGE :-

→ In , home page added a review part where user can give review .

→ And delete the review .

→ Added "javascript" for better functionality .

supremo®

Date :- 10/03/25

- \* UPDATED DESIGN OF HOME PAGE :-
  - I have updated the design part of home page.
  - Added some more designs for better look.

~~10/03/25~~

Date :- 11/03/25

Date :- 14/03/25

\* WORKING ON DELETE BUTTON OF  
ADMIN DASH BOARD :-

- Working on delete button next  
to each record in the data  
table.
- Implemented a popup confirmation  
before deletion to prevent accidental  
removal.
- Ensured that delete button only  
shows the term is available or  
unavailable and not completely  
deleted the record.

Date :- 15/03/25

\* WORKING ON SECURITY PART OF  
MY PROJECT :-

- Working on spring security.
- Used Brumpt password encoding to security store and verify user credentials.
- Applied authentication and authorization, restricting access to sensitive operation.

Date :- 16/03/25

### \* ADDED SECURITY CODE :-

- permitAll()
  - anyRequest().authenticated()
- https://format>Login (form → form  
loginPage ("customers/login"));
- Implemented @ Bean annotation.
